

Use two poles circuit breaker for 220V-(phase-phase) and single pole circuit breaker for single phase conductor to 127V-and 220V-(phase) phase and single pole circuit breaker or fuse at the main electric self-phase (all phase) and phase (all phase). The connect the circuit breaker or fuse at the main electric self-phase (all phase) and phase (all phase) will be considered the circuit breaker or fuse at the main electric self-phase (all phase).

-Importante: Este aparato puede ser usado con dispositivo Diferencial Residual ("DR").
Para esto la resistividad delagua no debe ser inferior a:
Important: This shower can be connected by resideual current circuit breaker (RCCB)
